

FUNNY FACE TUTORIAL

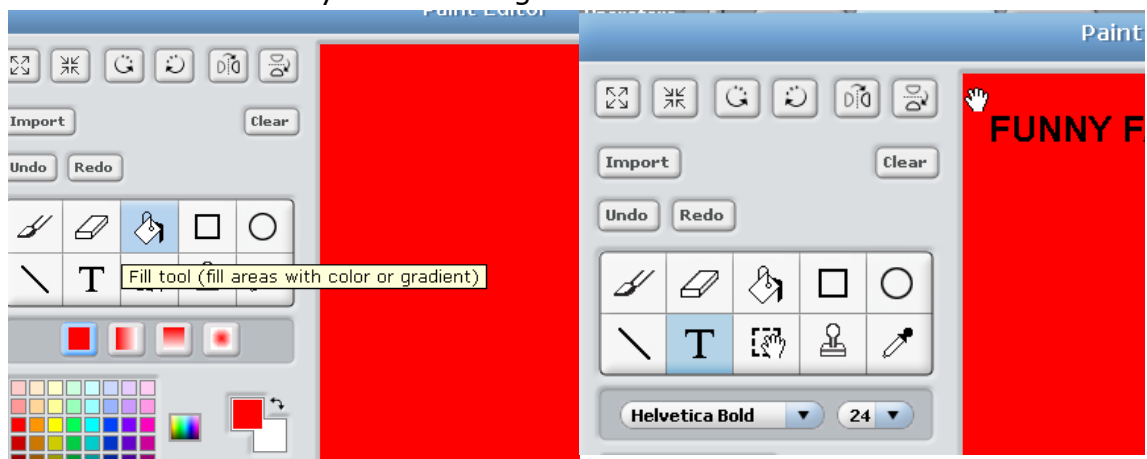

1. Open new Sprite Project

2. STAGE

- Create your background/STAGE.
- Click on the Stage Icon; then click Edit.

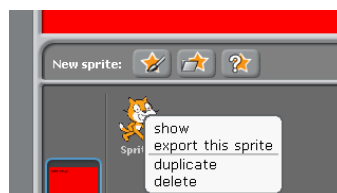

- Apply a red fill background using the Fill Tool.
- Add some text "Funny Faces" using the Text Tool.

- Now add the following code to your Stage.

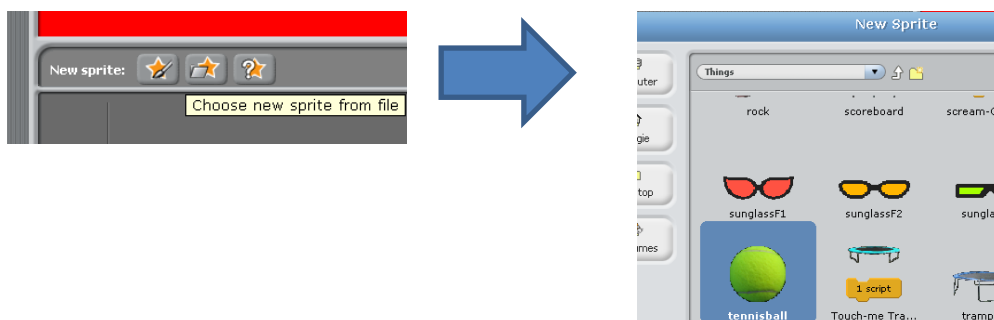

- Probably a good time to save your Project now!! (File -> Save As...)
- Delete you cat sprite.

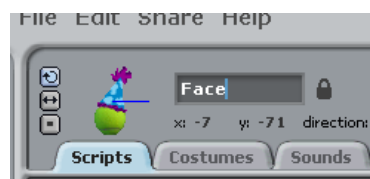

3. ADD A FACE

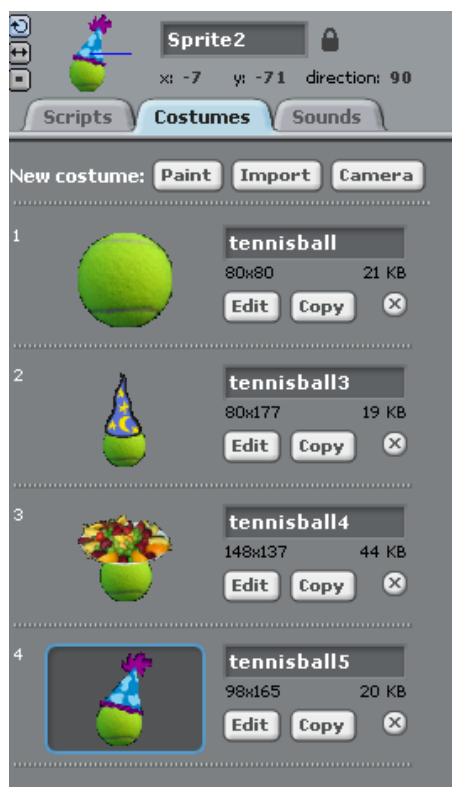

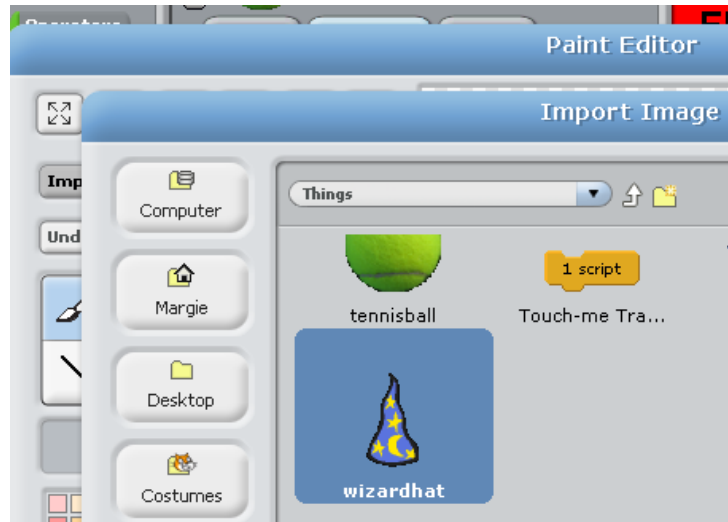

- Choose new sprite from file – in this case I chose the tennisball.

- Now give it the name "Face".

- Click on the Costumes Tab and create 3 (or more copies) of the tennisball by clicking on Copy.
- For each costume you can import various images to decorate the face. See the examples below.

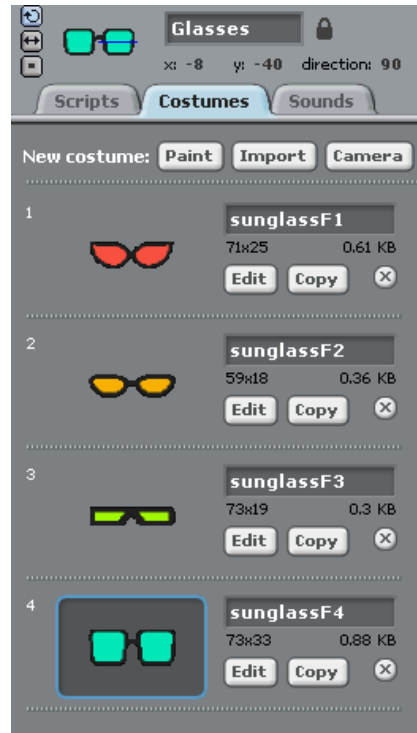

- Now add the following code to your “face” sprite.

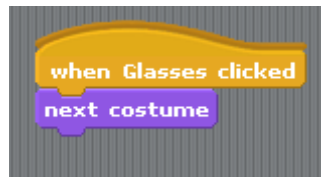

4. Glasses, Mouth, Nose

- Similarly to the face create some glasses for your sprite.
- Add some different costumes.

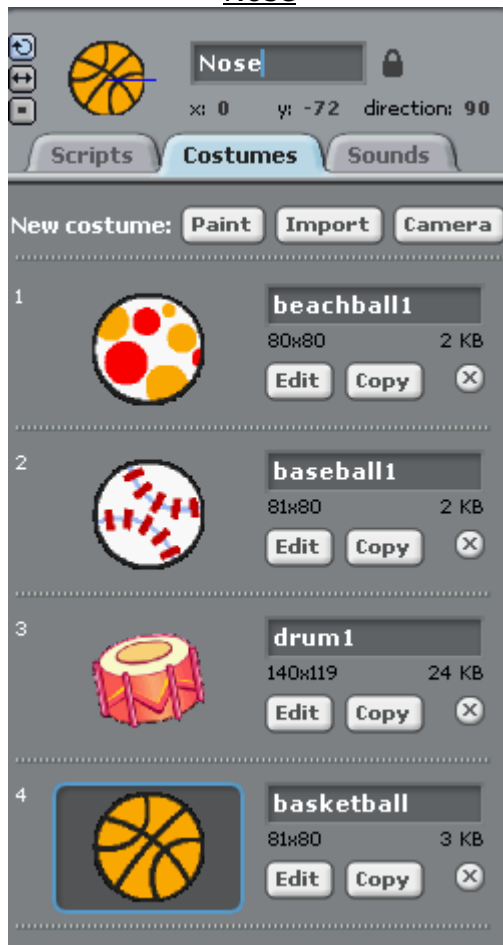

- Add the following script/code.

- Following the same steps as above add a nose and mouth to your sprite.
- Add at least 3 or 4 costumes to each.
- Add the same script code as for the face and glasses.
- Use the resize buttons to resize nose/mouth/glasses as appropriate.

Nose

Mouth

- Now have some fun with your funny face!!
- Add some ears if you like.
- Change the music!!
- Change your background!!
- Have some Fun!!
