

Sprite Tutorial

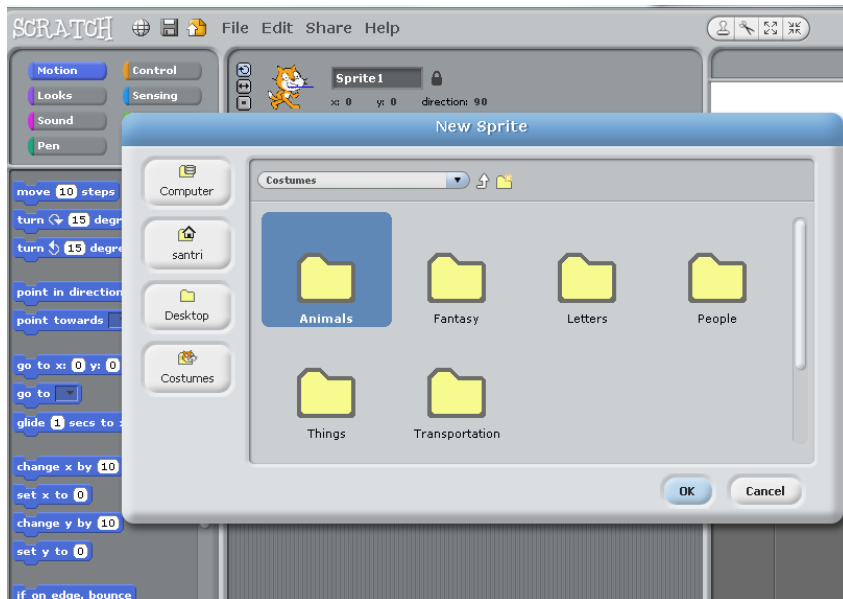

- Work with a mentor to get your laptop setup and get the Scratch program installed.
- Open Scratch. You have a picture of a cat on the screen. The white area where the cat is called your stage.
- Underneath the stage click the “Surprise Sprite” () button
- Pressing this will add more characters (Sprites) to the stage.

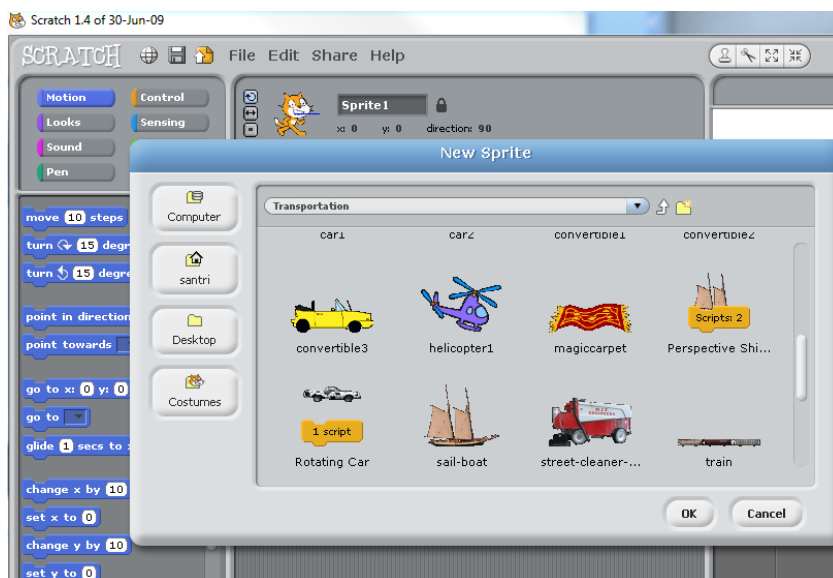

- To remove a Sprite from your stage
 - o Go to the grey area underneath the stage
 - o Move the mouse to the sprite you want to remove.
 - o Right-click with the mouse and select “delete”.

- You can select a sprite of your choice by using the “Choose New Sprite” () button.

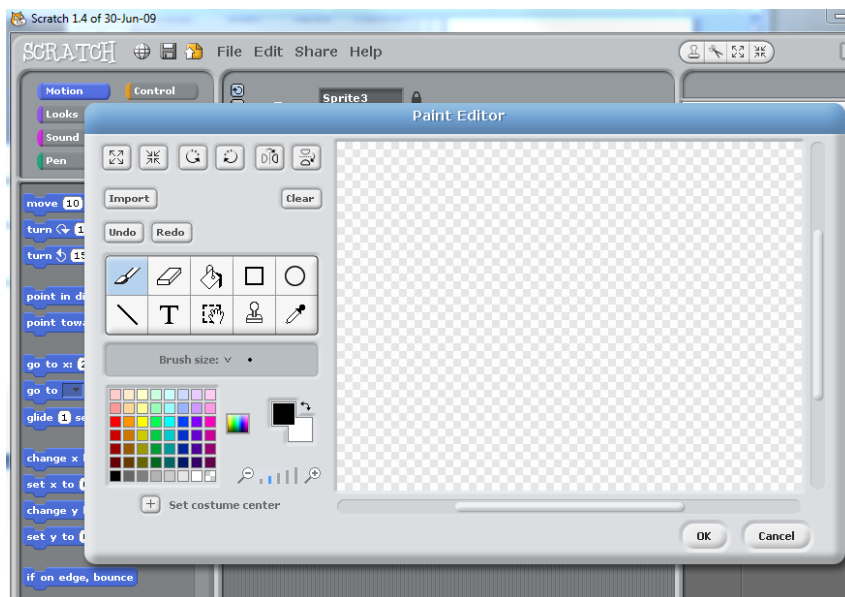

- Select a folder you want to look at and double click

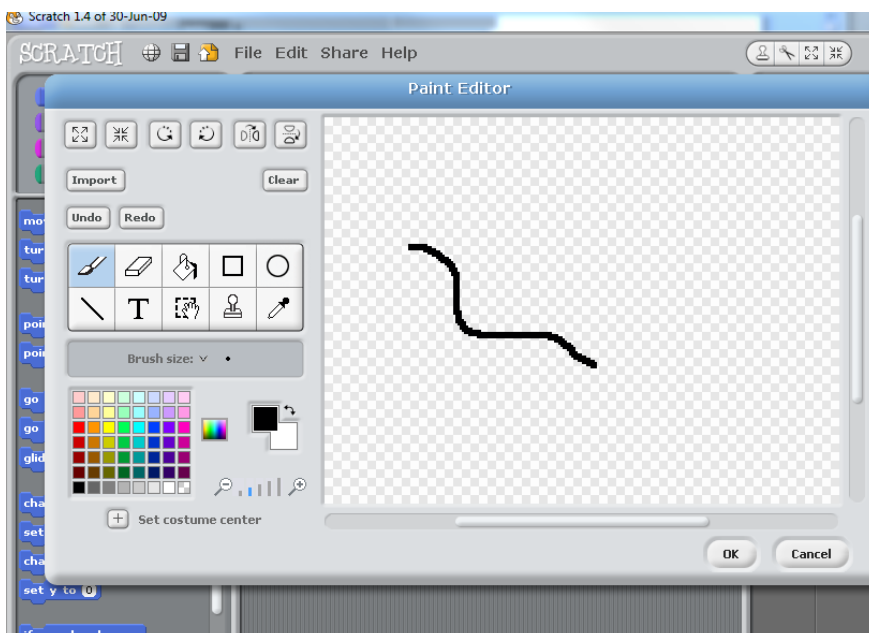

- Select a sprite you like and double-click. It should appear on your stage.
- Experiment with adding and removing different sprites. Find one you like.

- You can also click the “Paint New Sprite” () button and create one of your own using the editor.

- Click and hold the mouse button to draw a simple line.

- Use the menu on the side to select more shapes and colours, select the square to draw a square shape and so on.
